

Elma 2100X – KAT IV Voltage tester with display

Voltage/Continuity/phase rotation

EAN 5706445140060 / EL-NR 6398167057

Elma 2100X is a new and unique voltage tester with high safety and lots of clever details including: Long and highly flexible lead, fast attachment “click on” of test probe to the instrument, changeable test tips 2/4 mm and integrated protective cover with sockets to prevent losing the test tips. In addition to the display, Elma 2100X have many extra functions to ease the work dag, for example full voltage indication without batteries, preventing accidents and misreading. The instrument has auto select of function, making it virtually impossible to operate wrong. • Voltage test, 2 pole with LED (12-690V AC/DC) • Voltage test on display (7-800V AC/DC) • Voltage test, 1 pole, indicating phase • Phase rotation test, 2 pole • Continuity with LED and acoustic signal • Automatic self test function. • Full voltage indication, even without batteries • Automatic on/off function – no buttons • Build in, bright white, LED flashlight • Double insulation, IP65, GS approved CAT IV 600V. Elma 2100X is provided with battery and fulfills IEC 61243-3, EN 61010-1 KAT IV 600 and TUV/GS.

Technical data:

Voltage indication:	12, 24, 50, 120, 230, 400 and 690V AC/DC
Display:	7.0 – 800/720V AC/DC
Test current :	< 3,5mA
Voltage test 1 pole:	100-690V AC
Continuity :	0-400 kΩ;
Phase rotation:	2 pole, 200-690V 50/60Hz
Operating temperature:	-15..55°C
Safety:	IEC 61010-1 KAT IV 600V / KAT III 1000V, IEC 61243-3 / 61010-031 / 61557-7, TUV/GS, double insulation
Protection:	IP65
Test lead :	Silicone
Battery:	2x1.5V LR03 (incl.)
Dimensions:	246 x 64 x 29mm
Weight:	190g
