

Phantom 320

EAN 1033625 / E-NR

The Phantom Miro C320J and C320 provide HD imaging for on-board auto crash testing and a range of other applications.

- 1480 fps at 1920 x 1080
- Exposure Range:
 - Mono 10,000 – 50,000
 - Color 2,000 – 10,000
- Memory Capabilities:
 - 8 or 16 GB RAM
 - 128 GB internal, non-removable CineFlash
- Models:
 - C320J – 1 cable connection to Miro JBox 2.0
 - C320 – stand-alone or Miro JBox compatible

The Phantom Miro C320J and C320 offer 3GPX/sec throughput, with a maximum frame rate of 1480 fps at full 1920 x 1080 resolution. They are small, rugged and built in the same form factor as the Miro C210J and C210, making them perfect to incorporate into automotive crash test operations. Tested and proven to withstand shocks of up to 170G and vibration of 24 Grms, the cameras also come with an internal back-up battery and Flash, to ensure critical test images are captured and saved.

The cameras use a sensor with tightly packed 10 micron pixels for great light sensitivity. When combined with the advanced features shots are delivered quickly with clear detail. 13 shots can be saved into the 128GB Flash before downloading is required, ideal for situations with repeat set-ups or experiments. These new features can help improve speed and image quality both on the auto test floor and in cutting edge laboratories.
