

Phantom Miro 111

EAN 1033627 / E-NR

The Phantom Miro 111 is a compact and versatile high-speed camera. It is available in two body styles to accommodate different needs. The LC body is for complete handheld use and the LAB style is for software-based applications. It is compatible with hot-swappable CineFlash recording media.

- 1600 fps at 1280 x 800
- ISO Ratings:
 - Mono 6400 D
 - Color 2000 D
- 12 GB RAM

The Miro 111 has 1 Gpx throughput to deliver the full 1 Mpx imaging at 35mm. The full size sensor allows for the use of wide-angle, high-quality lenses. With interchangeable lens mount options the Miro 111 can accommodate Nikon, PL, C, and Canon EF (with electronic control) lenses.

The small body design is extremely lightweight weighing approximately 3 lbs (1.4 kg). The compact body increases the flexibility of use including such applications as robotic arms and drone flight. The LC series includes the Miro MiniBOB. This additional tool secures to the top of the camera and allows access to additional ports as needed.
