

Phantom VEO4K PL-RLS

EAN 1033621 / E-NR

The Phantom VEO4K PL-RLS produces highly detailed 4K imaging at 1,000 fps in a rugged and compact housing. Features include access to Cfast 2.0 recording media and the connections necessary to accommodate media production needs.

- 938 fps at 4096 x 2304
- Super 35mm sensor with ISO Ratings:
 - Color 320 T (rolling shutter)
 - Exposure Index: 800 – 1000 color
- 36 or 72GB RAM
- Rolling Shutter

The VEO4K-PL-RLS brings the high imaging standards of the Phantom Flex4K to a portable and rugged body style. The compact body increases the flexibility of use including such applications as robotic arms and drone flight.

The 35mm images are detailed, high-resolution, and full sized. The 9.4 Gpx throughput is powerful so quality is not lost at high frame rates and upholds the low noise requirements of the industry.

While the VEO4K-PL-RLS does come with a standard PL mount there is user flexibility through the optional and interchangeable lens mounts. Nikon, C, and Canon EF (with electronic control) mounts are available to increase workflow needs.

The VEO4K-PL-RLS housing comes standard in our S-style body. With full features and connections the body is made from milled aluminum, has sealed electronics (to protect from air and dust), is lightweight (approximately 6 lbs. or 2.8 kg), and is ruggedized to increase the durability in harsh environments.
