EAN 1033911 / EL-NR 1033911

Ofil DayCor Ranger HD Corona kamera

Vehicle Mounted Inspection System.

Inspection is semiautomatic, letting operators the option to configure preset shooting positions and profiles and control recording. DayCor® Ranger HD is remotely controlled by the operator who sits inside the vehicle. The detecting unit is mounted either on the vehicle roof or elsewhere, depending on the desired viewing angle. Throughout its operation the system streams out high-resolution video that is displayed on a remote monitor in the car and records video clips of corona findings.

Ofil offers 2 models of Ranger: Ranger UV which provides for corona detection, and Ranger MS which provides for corona detection and other technologies, based on customers' request. Additionally, Ofil offer customization and tailoring the system to specific requirements.
