

## Elma 1500B - voltage and continuity tester

Elma1500B is a new, small and handy tester with 3 features: - Voltage test 12-690 V AC / DC, 2-pole with LED indication  
- Test with both audible and visual indication - Phase indication.

The tester has clever testprobes with 19mm spacing to fit directly into most sockets and enables one-hand operation. The instrument has no buttons and switches automatically between the different functions to prevent wrong operation. Elma 1500B uses standard batteries, and to ensure high safety, voltage indication is active even without batteries. Elma 1500B is fulfills IP 54 protection and meet IEC 61010-1 CAT IV 300V and CAT III 690V and EN 61243-3.
