

## Elma 609 no-touch skin thermometer

Measure skin temperature without contact

Using Elma 609, you can fast and safe, without contact, measure body surface temperature. Point the thermometer at the forehead at about 5 to 15 cm and instantly read out the temperature.

Elma 609 is delivered with two ranges, body temperature 32..42.5°C and surface temperature 0..60°C with 0.1°C resolution. The instrument is delivered with several clever e.g. memory for 32 measurements, alarm limits, auto datahold and auto power off, for extended battery life.

Elma 609 is ideal for quick scan for body temperature and fever, but also for other surfaces. The instrument fulfills relevant medical standards like EN 980, EN 1041, EN 60601-1 EN 60601-1-2 and ASTM E1965-1998. Supplied ready for use incl. bag, battery and manual.

### Technical data:

<b>Battery:</b>	2 x 1.5V LR03 (Incl.)
<b>Dimensions:</b>	149x77x43 mm
<b>IR range:</b>	32.0...42.5 / 0...60°C
<b>IR resolution:</b>	0.1°C
<b>IR Temperature accuracy:</b>	±0,2°C@36...39°C
<b>Net weight:</b>	172g
