

Elma BM251s - Multimeter with PC communication

Elma BM251s is a new handy multimeter with many features and built-in PC communication. The meter measures current, voltage, frequency, resistance and continuity. The instrument has built-in contact detection of electric fields, which can be used to detect electromagnetic fields from computer monitors.

Elma BM251s has optional automatic / manual range selection, intelligent auto power off, relative measurement, and data hold. With the PC communication and Windows software (optional), it is possible to conduct on-line data logging. The instrument warns faulty connection and has high efficiency fuses. Meets include IEC 61010-1 CAT III 600V and comes complete incl. protective rubber coating, test leads, batteries and operating instructions.

Technical data:

Voltage:	0-60m-600m-6-60-600-1000V AC / DC
Accuracy DC:	± 0.5% +2 D, AC: ± 1% +3 D
Current:	0-500
Accuracy:	
Resistance:	
Frequency:
