Elma Laser x360, three axis 360° lines, green for extended visibility

Rugged, IP54 for every environment with rechargeable Li-Ion battery

The brand new Elma Laser x360 line- and X laser is equipped with the latest technology, using green laser light, for enhanced visibility. The human eye is about 4 times more responsive to green light, than classic red, increasing the visible range remarkable, both in- and out doors. Elma Laser x360 provides perfect markings even in long range, eliminating the need to draw on the floor, walls and ceilings. This makes the task of installing shelves, paintings, kitchen tables etc.

Elma Laser x360 is indicating single, dual or triple axis 360°, for perfect leveling in all dimensions. Fast and easy, and you have both hands free to work. Just place the laser and turn it on, it's as simple as that.

Forget about time consuming, accurate leveling of the instrument. Elma Laser x360 is self leveling, and if the deviation is too big, the laser will indicate by fast blinking, making operating error impossible. Besides horizontal and vertical 360° lines, you are able to make straight lines in sloping angles, useful e.g. for stairways etc. Lock the Elma Laser x360 to deactivate the self leveling mechanism, and set the angle, simply by placing on standard tripod or on the supplied magnetic adapter. When the leveling is locked, the instrument will indicate, by blinking every 3 second, to prevent mistakes. As additional safety against errors, Elma Laser x360 can't be turned off, when the lock is deactivated, securing the pendulum suspension against transport damage.

Elma Laser x360 all dimension laser is delivered ready to use in nylon bag, including batteries, manual and magnetic adapter.

Technical data:

Visual range:	To 45m depending on light
Vertikal accuracy:	±3mm@ 10m
Horizontal accuracy:	±3mm@ 10m
self leveling:	°
