

Surface temperature sensor type 101

Type K thermocouple -range -50 to 450°C

Type K thermocouple The sensor is with fixed type K plug and handle and 1m coiled cord. Measures surface temperatures with spring loaded sensor. Suitable for all instruments compatible with type K thermocouples. It is advisable to use contact paste (Found in the "Accessories" tab).

Technical data:

Feeling type:	Type K
Temperature min (C°):	-50
Temperature max (C°):	450
Accuracy (C°):	2.5
Reaction time:	5
Measurement on probe:	Ø7,5 x 130 mm
